

Picosens GmbH

Founded in 2007, Picosens GmbH develops and patents visionary solutions in the area of sensor technology. Besides patent and license placement, Picosens brings innovations that it has developed into its own product portfolio and offers R & D services for highly technical customer projects. Currently, Picosens is developing products for core applications in security and access systems, building services, and materials analysis for a wide variety of industrial applications.

We are looking immediately for a co-worker for construction and prototype construction

Your tasks

- CNC milling and CNC turning from prototypes to small series (100 pieces)
- Introduction of own ideas to solve problems
- Collaboration on "other" projects within the company
- Construction work (3-D CAD drawing)
- Material procurement & assembly
- Machine Care

What we want from you:

- Qualified training as an industrial mechanic, toolmaker or a comparable discipline
- Several years of experience with lathes and milling machines
- Programming of milling machine control
- Experience in solving simple to complex problems
- Milling, turning and drilling professional experience and knowledge

You are enthusiastic about new future-orientated visions and like to think outside the box in order to discover and explore new solutions?

Please send your detailed and complete job application documents to Ms Andrea Riemann, management assistant, at the following email address. [andrea.riemann \(at\) picosens.de](mailto:andrea.riemann@picosens.de)
