

## Picosens GmbH

Founded in 2007, Picosens GmbH develops and patents visionary solutions in the area of sensor technology. Besides patent and license placement, Picosens brings innovations that it has developed into its own product portfolio and offers R & D services for highly technical customer projects. Currently, Picosens is developing products for core applications in security and access systems, building services, and materials analysis for a wide variety of industrial applications.

## We are looking immediately for a Product manager

### Your tasks

- Establishment and maintenance of the product portfolio
- Development and evaluation of product ideas
- Specify products considering market, competition and sales analysis
- Managing the technical as well as the economic product life cycle
- Manage development teams to ensure time to market launch, product quality, and compliance with specifications and standards
- Creation and responsibility of product documentation
- Co-creation of the product marketing including positioning, price definition, distribution and communication
- Coordination of product launch
- Training of sales staff, partners and customers, as well as advising on support requests
- Contribute to the acquisition and support of partners and customers

### What we want from you:

Proven experience in the field of product management, very good technical understanding, interest in market trends and a sense for customer needs as well as for the transfer of innovations into applications, enjoy working in a highly dynamic, international environment.

- Industrial engineer / business manager with technical background
- Experience in the area of market analysis (target group specification, competition analysis)
- Experience with the specification of products
- Structured customer and result-oriented working method
- International experience
- Strong communication skills and fluent German and English skills, other languages are an advantage

Are you enthusiastic about new future-orientated visions and can realize ideas into concrete projects? Please send your detailed and complete job application documents to Ms Andrea Riemann, management assistant, at the following email address.
