

Picosens GmbH

Founded in 2007, Picosens GmbH develops and patents visionary solutions in the area of sensor technology. Besides patent and license placement, Picosens brings innovations that it has developed into its own product portfolio and offers R & D services for highly technical customer projects. Currently, Picosens is developing products for core applications in security and access systems, building services, and materials analysis for a wide variety of industrial applications.

We are looking immediately for a Project manager for customer projects and product development

Your tasks:

- Management of interdisciplinary teams in internal and customer-specific development projects
- Contribute in the coordination of project content and objectives, as well as in the preparation of quotations for customer-specific projects
- Planning of projects taking into account available time, budget and staff resources
- Coordination and collaboration with marketing, research, development, and operations
- Ensuring the quantitative and qualitative project goals
- Creation and responsibility of the project documentation
- Reporting of project status to the management and customer

What we want from you:

Knowledgeable, with many years of professional experience in the management of projects combined with a very good technical understanding of our solutions, customer and solution-oriented work ethic, enjoyment in working in a highly dynamic and international environment.

- Successfully completed studies in the field of electrical engineering / technical informatics / industrial engineering or similar
- Experience in ISO 9001, standards, CE recognition and VdS certification would be beneficial
- Structured customer and result-oriented work ethic
- High teamwork and communication skills
- Assertiveness and confident appearance
- Fluent proficiency in German and English

Are you enthusiastic about new future-orientated visions and can realize ideas into concrete projects? Please send your detailed and complete job application documents to Ms Andrea Riemann, management assistant, at the following email address.
