

Picosens GmbH

Founded in 2007, Picosens GmbH develops and patents visionary solutions in the area of sensor technology. Besides patent and license placement, Picosens brings innovations that it has developed into its own product portfolio and offers R & D services for highly technical customer projects. Currently, Picosens is developing products for core applications in security and access systems, building services, and materials analysis for a wide variety of industrial applications.

We are looking immediately for a Software engineer for product development

Your tasks

- Cooperation in product development
- Accompany the projects from concept to series maturity
- Contribution to the concept and design of hardware-based software and product-specific user interfaces
- Implement complex and time-critical algorithms
- Development and extension of existing user interfaces for embedded devices and Smartphones
- Design, implementation, documentation and maintenance of manual and automated tests
- Support of production and support with software and tools

What we want from you:

Enjoyment of programming and have attained first job experience in software development, knowledge of performing software tests, solution-oriented work ethic and enjoy working in a highly dynamic and international environment. A very good technical understanding in our field of activity is required.

- Completed studies in computer science or a comparable technical branch
- First professional experience with microcontrollers or embedded systems
- Basic electronics knowledge
- Experience in the following areas would be an advantage but not a requirement: mobile software development (Android, iOS), C #, Octave
- Responsible, structured and conscientious working methodic
- Hands on mentality
- A good command of English

Are you enthusiastic about new future-orientated visions and can realize ideas into concrete projects? Please send your detailed and complete job application documents to Ms Andrea Riemann, management assistant, at the following email address.
