

Picosens GmbH

Founded in 2007, Picosens GmbH develops and patents visionary solutions in the area of sensor technology. Besides patent and license placement, Picosens brings innovations that it has developed into its own product portfolio and offers R & D services for highly technical customer projects. Currently, Picosens is developing products for core applications in security and access systems, building services, and materials analysis for a wide variety of industrial applications.

We are looking immediately for a Trainee in product management and sales

Your tasks

- Specification of existing and new product ideas
- Creation of market & competition analysis in relevant markets
- Identification of potential applications and target groups
- Co-design of product documentation and product presentation materials
- Contribution to the coordination of upcoming product launches
- Generation and evaluation of inquiries and provision of quotations
- Advice on technical questions & support requests

What we want from you:

Good technical understanding, interest in the transfer of technical innovations into fields of applications and products as well as market trends and customer needs, enjoy working in a dynamic and highly innovative technical environment.

- Student in the field of industrial engineering / business administration with a technical background
- Knowledge in the field of market analysis (target group specification, competition analysis, ...)
- High teamwork and communication skills
- Very good language skills in German and English
- Very good MS Office skills (Word, Excel, PowerPoint, ...)
- Experience in specifying products is beneficial

You are passionate about new future-oriented visions in a technical environment and are interested in working in product management and sales?

You enjoy working in a dynamic, creative and efficient environment and you count these qualities to represent your own strengths?
